PROFESSIONAL SUMMARY

Full Stack & Mobile Developer focused on React, React Native, and Supabase, currently pursuing a Software Engineering degree (7th semester). I combine hands-on IT support experience with a user-oriented development mindset, understanding both the infrastructure and the interface. I work on migrating PWA applications to React Native and building new products from scratch, with a strong commitment to clean code, best practices, and great user experience, bringing together technical diagnosis, clear communication, and the delivery of scalable solutions.

TECHNICAL SKILLS

Frontend & Mobile: React, React Native, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite, PWA, Flutter/Dart.

Backend & APIs: Node.js, Express.js, Next.js, RESTful APIs.

Databases: PostgreSQL, Supabase, Firebase.

Tools: Docker, Git, GitHub, GitHub Actions, Vercel, Railway, VS Code, Cursor, Figma.

Methodologies: Scrum, Clean Code, Information Security.

PROFESSIONAL EXPERIENCE

Mobile Developer | The Door

05/2026 – Present

- Took part in the complete migration of the PWA application (React) to React Native, modernizing the architecture and significantly improving mobile performance and experience.
- Continuous end-to-end delivery of new features, with a direct focus on performance, scalability, and user experience.
- Built new applications from scratch, ensuring code quality, best practices, and an architecture ready to scale.
- Managed the versioning workflow with Git/GitHub branches, ensuring stable and controlled integration into the main repository.

Level 1 Support Analyst | Nexsion

10/2025 – 05/2026

- Resolved bugs and analyzed systems on the service desk, contributing to a reduction in recurring incidents and greater application stability.
- Identified and fixed failures, ensuring SLA compliance and the operational continuity of services.
- Mapped service desk workflows, identifying bottlenecks and proposing improvements that optimized operational processes.
- Managed and prioritized tickets, acting as the interface between technical teams and clients to align requirements.

Office Services Assistant | JMP Representações

01/2025 – 09/2025

IT Support Assistant (Internship) | Procon Goiás

05/2024 – 12/2024

INDEPENDENT PROJECTS & CO-FOUNDER / DEV ROLES

Full Stack Developer | Combinas (Fashion Tech)

03/2026 – Present

Architecture and development focused on evolving an e-commerce platform aimed at the fashion market. Direct involvement in the product's innovation ecosystem, integrating AI-based virtual fitting room tools and optimizing frontend performance.

Full Stack Developer | BioSpine labs (HealthTech & IoT)

05/2026 - Present

Architecture and development of a technological solution for posture monitoring and correction, based on smart sensors integrated into a biomedical vest. Worked on building the software ecosystem responsible for collecting and analyzing biomechanical data, identifying spinal changes, and triggering adaptive mechanisms for real-time personalized device adjustment. Full technical responsibility over the ecosystem, covering solution architecture, mobile development, backend, database modeling, IoT sensor integration, and real-time data collection and processing.

FEATURED PROJECTS

Mo Lucro (Financial Portfolio Management Platform)

Development of a cross-platform fintech application for investment management, portfolio control, and real-time tracking of financial operations. Implemented secure authentication integrated with Supabase, automatic session persistence, and continuous cloud data synchronization. Built financial dashboards with interactive graphical visualization for performance analysis, asset growth, and transaction monitoring. Structured the application with a modular architecture, reusable components, and a focus on scalability, user experience, and continuous maintenance.

Technologies: Flutter, Dart, Supabase, PostgreSQL, fl_chart, Google Fonts, Intl, JWT Authentication, Cloud Sync, Mobile Development.

Twinance (Couple Financial Management Platform)

Development of a fintech platform for shared financial management between couples, with expense control, spending categorization, and real-time financial tracking. Implemented secure authentication, Supabase integration, and interactive dashboards for spending analysis and comparison.

Technologies: React, TypeScript, Node.js, Express, Supabase, PostgreSQL, Tailwind CSS, Recharts, REST API, and Git.

EDUCATION

Bachelor's Degree in Software Engineering UniEVANGÉLICA – Evangelical University of Goiás (Anápolis/GO, Brazil) | 2023 – 2026

CERTIFICATIONS & COMPLEMENTARY COURSES

- AWS Skill Builder (In progress)
- Programming Best Practices, Clean Code, and Design Patterns
- React Native App Development Bootcamp

LANGUAGES

Portuguese: Native

English: Intermediate

Spanish: Intermediate
